Projects

Library Management System

May 2024 – June 2024

- **Technology Used:** Python, Django, HTML, CSS, Django ORM
- **Description:** Developed a comprehensive Library Management System aimed at efficiently managing library resources and operations. Utilized Django Templates along with HTML and CSS for front-end development to create a dynamic and user-friendly interface for library users. Implemented robust user authentication and authorization to ensure secure access to various functionalities, and employed Django ORM for seamless CRUD (Create, Read, Update, Delete) operations on the database.

Taxi Booking System

December 2022- January 2023

- **Technology Used:** Python, SQL, Tkinter
- **Description:** Created taxi booking desktop software using Python and SQL, implementing object-oriented concepts such as classes, objects, and inheritance. Designed the user interface using Tkinter and utilized MySQL for backend operations.
